What does your software delivery pipeline look like?

A.

B.

(most people live here)

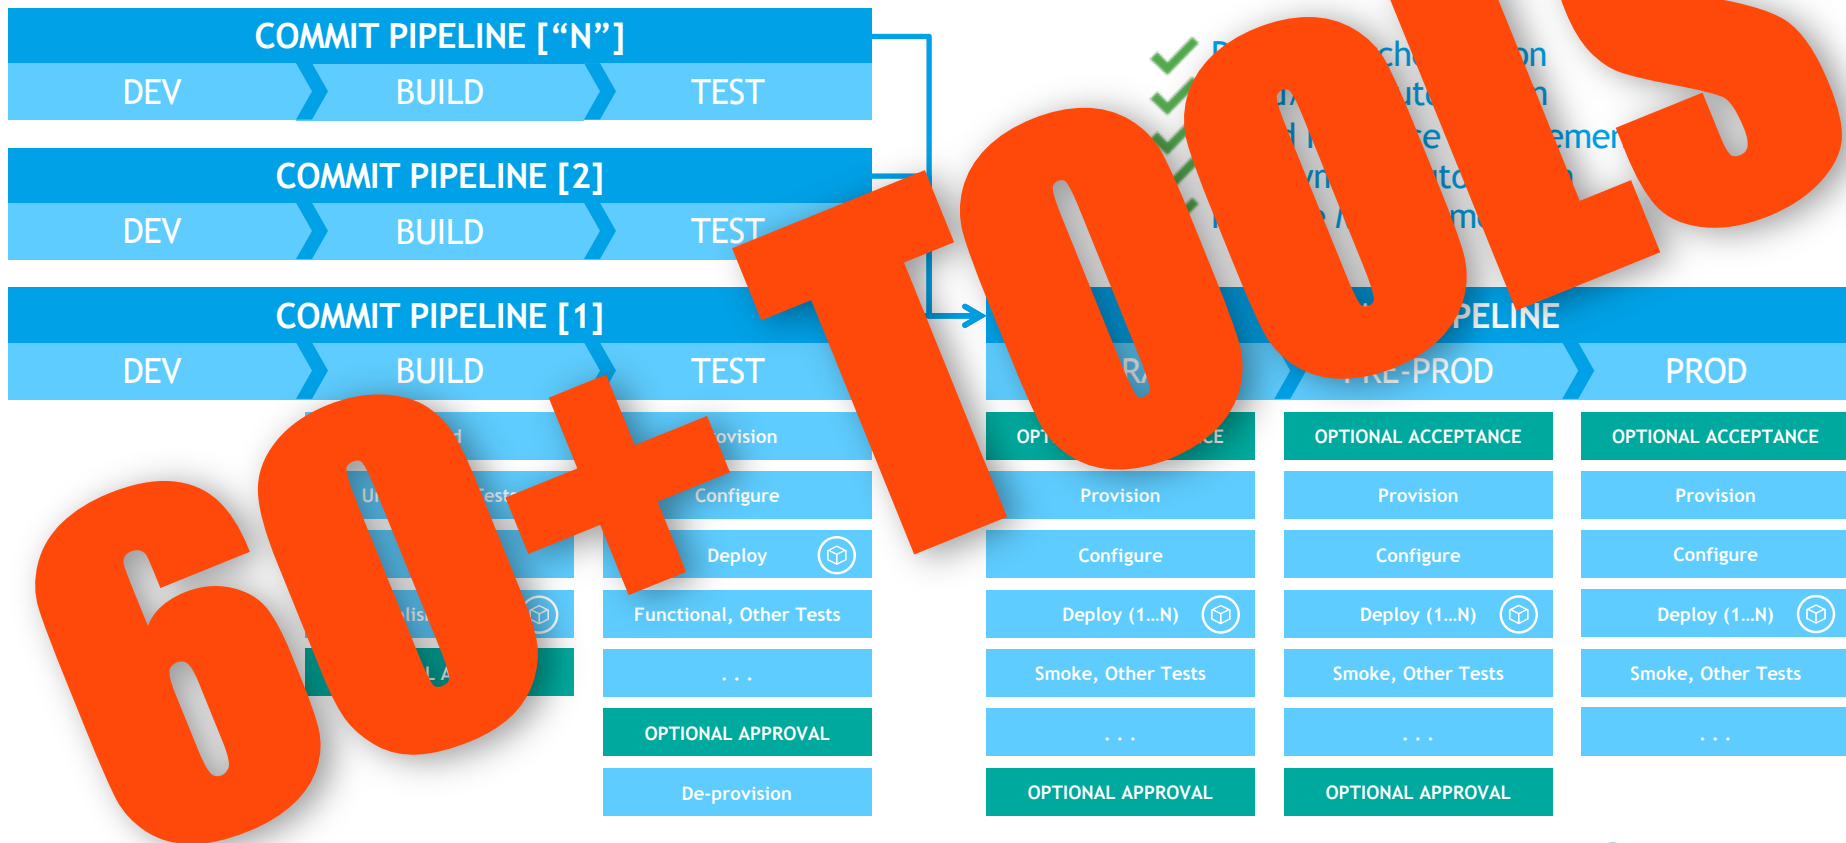

TEAM 1

DevNetwork.com, 2014

The Software Delivery Pipeline(s)

How many tools does **YOUR** team use?

An isometric illustration of a modern manufacturing factory floor. The scene features several orange robotic arms with grey joints, positioned over blue conveyor belts. The conveyor belts are equipped with grey rollers and are transporting various components, including black rectangular plates and orange blocks. The machinery is rendered in a clean, stylized manner with a color palette of blue, orange, and grey. The background is a solid light blue. A white rectangular banner is overlaid in the center of the image, containing the text "DON'T REPLACE. ORCHESTRATE." in a bold, sans-serif font. The word "ORCHESTRATE." is highlighted in blue, matching the color of the conveyor belts.

DON'T REPLACE. ORCHESTRATE.

ElectricFlow: DevOps Release Automation

Orchestrate your end-to-end software delivery pipeline

BUILD/TEST

FLEXIBLE AND
SCALABLE
AUTOMATION FOR
DEV AND QA.

DEPLOY

ANY APP.
ANY VERSION.
ANYWHERE.
ANYTIME.

RELEASE

TRADITIONAL
AND CD
PIPELINES
AND RELEASES.

ANY USE CASE

ORCHESTRATE
ANY PROCESS
AND TOOLCHAIN.

CLOUD PROVISIONING | RUNBOOK AUTOMATION | AND MORE

FlowUX, REST API, SDK, DSL, CLI

ElectricFlow Automation Platform

SHARED MODELS, PRACTICES

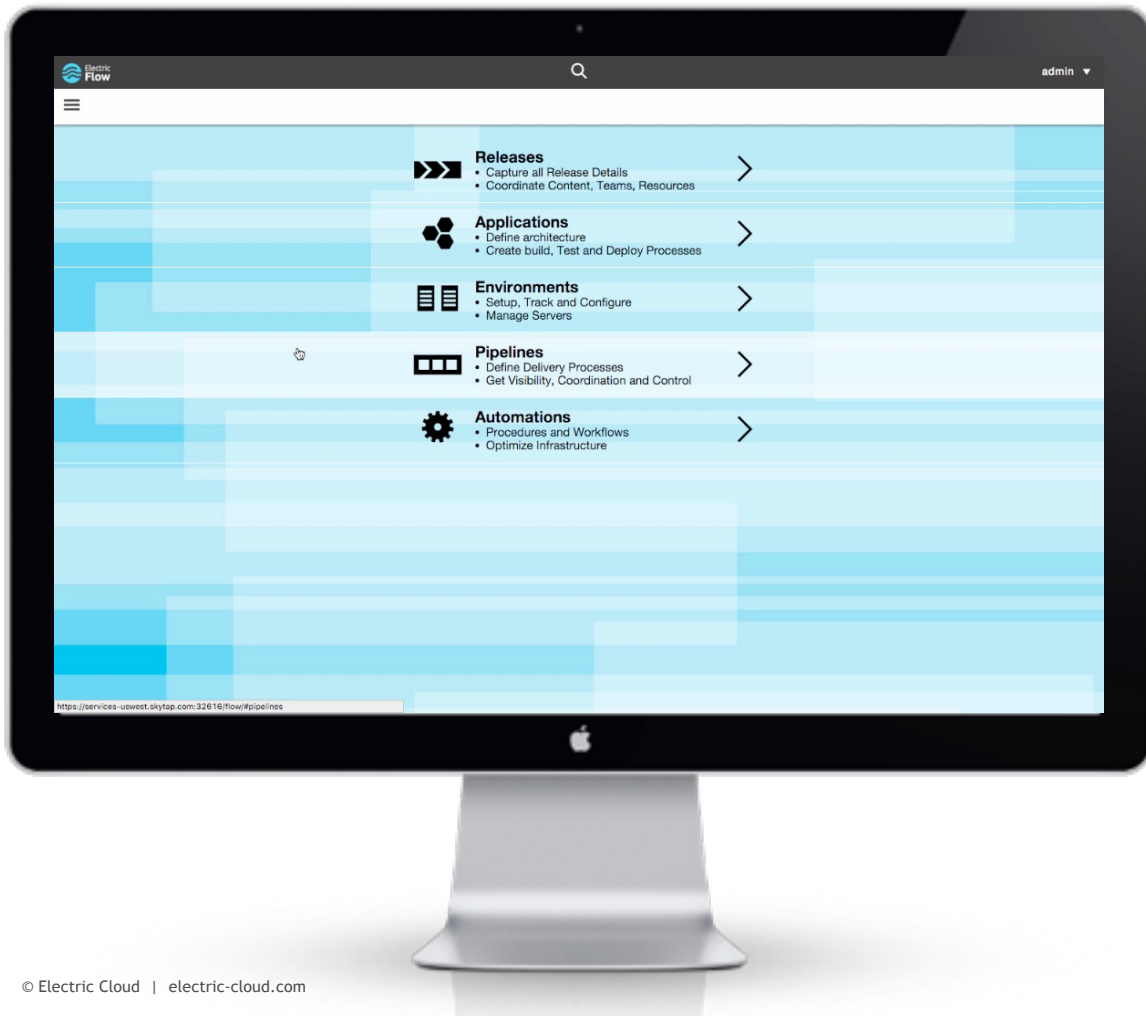

Applications, Environments,
Pipelines, Releases; Artifacts,
Snapshots

SHARED CONTROL, VISIBILITY

Tools, Resources, Approvals
Pipelines, Workflows,
Procedures, Jobs

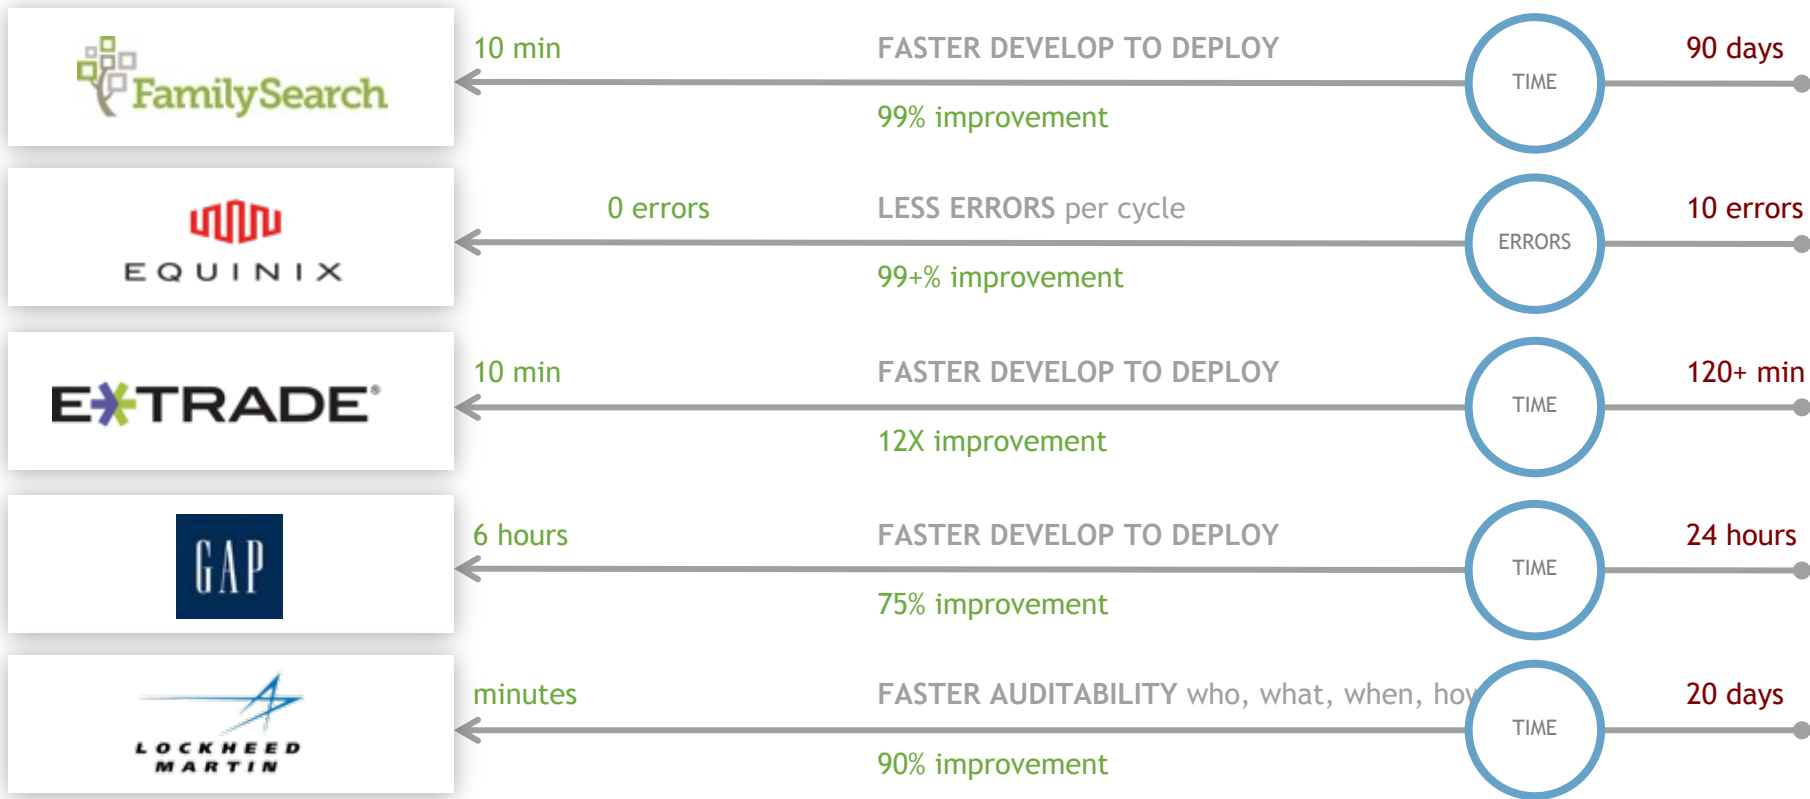

ENTERPRISE GRADE

Scalable, Flexible, Secure,
Traceable, Highly Available

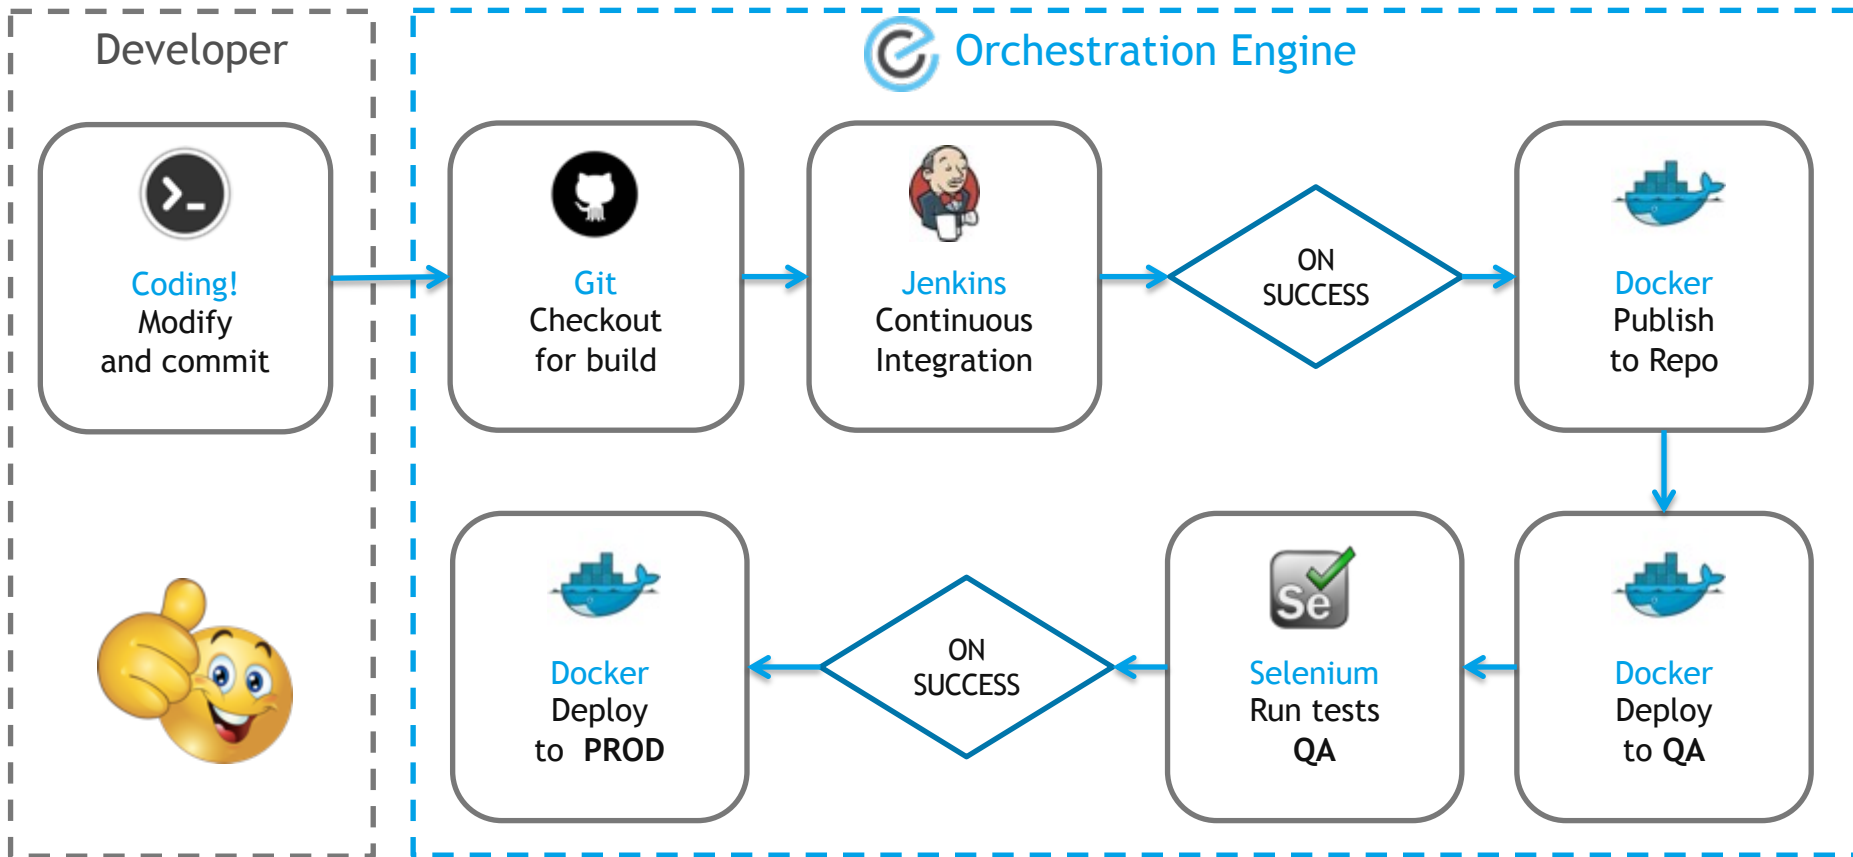

**ElectricFlow boosts
release security,
velocity and
transparency by
orchestrating the tech
stack your teams
already use.**

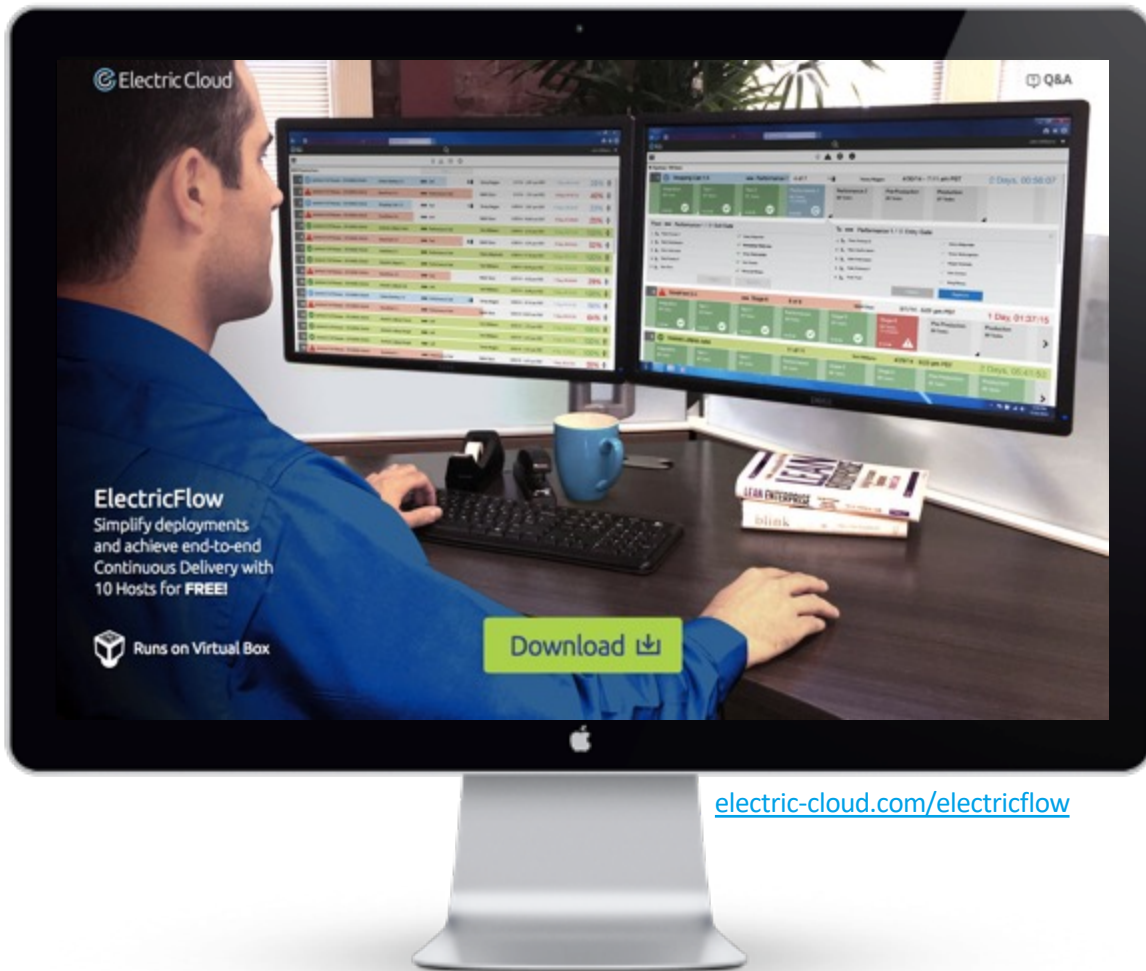

Transformative Benefits
